SELECTED WORK EXPERIENCE

Senior Engineering Manager at Demonware/Activision from 07/2023 to present
- Partnered with studios and Global Analytics to establish and execute an experimentation roadmap for matchmaking features in Call of Duty
- Obsessed over matchmaking KPIs and player experience in the Call of Duty franchise
- Championed the adoption of AI tools to boost engineer productivity
- Attracted and retained talent by leading several interview loops and promoting multiple engineers
- Skills: Python, Kubernetes, C++, Project Management, and Leadership

Senior Engineering Manager at Twitch/IVS from 11/2021 to 06/2023
- Supported a group of 5 high-performing engineers in charge of maintaining and enhancing services that support the global video infrastructure behind Twitch and IVS
- Led efforts to address technical debt and improve processes, testing coverage, and overall code quality through code reviews and documentation -- and got glowing reviews from direct reports
- Handled company-wide responses and wrote post-mortems to various high-severity Twitch and IVS incidents
- Attracted and retained talent by leading several interview loops and promoting multiple engineers
- Skills: AWS, Go, Project Management, and Leadership

Engineering Manager at Demonware/Activision from 08/2020 to 11/2021
- Worked closely with studios and tech leads towards establishing a long-term vision for cross-title social services
- Interviewed dozens of candidates for full-time and internship positions
- Led efforts to reduce toxicity in the Call of Duty online community
- Skills: Python, Kubernetes, C++, Project Management, and Leadership

Team Lead at Demonware from 11/2018 to 08/2020
- Led a team of 10+ Engineers (devs and SREs) responsible for creating online features for Call of Duty: Modern Warfare
- Worked closely with Infinity Ward and High Moon Studios to deliver novel services for cross-play support
- Led planning and building out services in Kubernetes for the first time in Demonware history at a large scale
- Skills: Python, Kubernetes, C++, Project Management, and Leadership

Software Engineer at Demonware from 11/2017 to 11/2018
- Led load testing efforts at unprecedented scale to push the boundaries of Demonware infrastructure in order to identify and mitigate performance bottlenecks for Call of Duty: Black Ops IIII
- Built scripts for analyzing and planning hardware allocation and to provision significant portions of the virtualized infrastructure behind the online services of Call of Duty: Black Ops IIII
- Developed features used by millions of Call of Duty players worldwide
- Skills: Python, Docker, C++, and MySQL

BIO

André completed his undergrad at UVic and returned to his hometown, Manaus in 2007. He nearly moved to Europe for more education at ETH Zurich, but life threw a curve ball at him. Instead, he stayed in Manaus in order to battle cancer and completed a Masters program while doing that. He then created an application for customs clearance, which was first adopted by his family business. Inspired by the Stanford Ignite program, André turned that into a SaaS venture of its own. He decided to move back to Canada and reboot his career to join the entertainment industry in 2017.

EDUCATION

Stanford Igniter 2015
Stanford Graduate School of Business
São Paulo, SP Brazil

MSc, Comp Sci 2009 - 2011
Federal University of Amazonas
Manaus, AM Brazil

BEng, CEng 2002 - 2007
University of Victoria
Victoria, BC Canada
